

# How to Update Timetable and News Sections of App.

You can update the clinic opening hours and news sections of the app yourself. Please treat this page as you would a key and do not let it leave the office. It is used to update the app.

To edit clinic opening hours, click [here](#) and edit the text in the page. The app will adapt so that the text fits inside the rectangular panel. Changes are saved automatically. You do not have to hit save. Restart the app to view the changes immediately.

To edit the clinic news panel, click [here](#) and edit the text in the page. The app will adapt so that the text fits inside the rectangular panel. Changes are saved automatically. You do not have to hit save. Restart the app to view the changes immediately.

## Additional Information:

Every time that app starts, it checks the internet to see if opening hours and news have been updated. It also checks the internet for an update once per hour, if the app is left running.

If there is no internet access, the app uses the information from the last time it successfully connected the internet. If the app has never connected to the internet it uses a default set of values, valid on 23/04/2019.
